Timmons Arena at Furman University

Furman University is a private liberal arts university located in Greenville, South Carolina. Founded in 1826 and named after Baptist pastor Richard Furman, it is the oldest private institution of higher education in the state. Although Furman became a secular university in 1992, it continues to uphold its historic motto, Christo et Doctrinae ("For Christ and Learning"). As of Fall 2021, the university enrolls about 2,300 undergraduate and 150 graduate students on its 750-acre campus.

Furman University's campus is nestled at the foothills of the Blue Ridge Mountains in South Carolina's Upstate region. Widely recognized for its beauty, the campus was ranked 23rd on Travel + Leisure's 2019 list of the 25 most beautiful college campuses in the United States. Among its notable facilities is Timmons Arena, a 4,000-seat multipurpose venue that has been home to the Furman Paladins basketball team since its opening on December 30, 1997.

A first-of-its-kind install of Futura's Safety Trim, this project also incorporated the Furman University logo and the Spinx logo, creating a built-in sponsorship opportunity. Furman University wanted a solution that would not only meet safety standards but also reflect their school spirit and visual identity. With custom color-matching and a design tailored specifically for their arena environment, Futura TredSafe® delivered.

A seamless blend of function and form. Our trims provided the necessary protection for high-traffic areas while complementing the arena's aesthetics. The installation process was straightforward, thanks to Tredsafe's® engineered simplicity, allowing for a clean finish without compromising durability.

This project is a testament to what's possible when safety meets customization. Whether it's a sports facility, commercial space, or public venue, Tredsafe® offers a versatile solution that adapts to your vision.

The custom Tredsafe® insert is manufactured from a special blend of PVC, silica quartz and polymeric plasticiser giving a homogeneous hard wearing anti-slip flooring for wet and dry conditions. Tredsafe® insert is resistant to attack from ultraviolet light, oil, grease, gasoline, salt, dilute acids and alkalis, common household chemicals and detergents. Suitable for interior or exterior use.
